2. INSTALLATION

2.1 How to explore the world of HumThum?

To get the HumThum application in your mobile you need to follow three simple steps.

2.1.1 Download

1. Go to www.HumThum.com , enter your mobile number and get the download link.
2. Get the application downloaded from www.getjar.com/Humthum

2.1.2 Install

Click the downloaded file and get installed.

2.1.3 Register

Enter the right information in the given field Name, Email address, phone no and your area pin code. Then click submit button to get registered.

The screenshot shows the registration page for HumThum. At the top, the logo "HumThum Knowledge Untied" is displayed. Below it, a brief description of the app's features is provided. The registration form includes fields for Name (shami), Email (shami@declun.com), and Pincode (638401). A red error message "Email already exists!" is shown next to the email field. A "register" button is visible, along with a link "Why To Register?". Below the form, a section titled "Register to use these services" lists various features: Create your Website, Scan 2D&1D Barcode, Currency Converter, Mobile Scanner, and Stock Quotes.

2.2 Creating Domain Name

The screenshot shows the domain creation page on HumThum. It features a "HOME" button and a link "Add Space Info". A message states: "After creating username, you can upload pictures and share it thro' http://{username}.humthum.com". Below this, instructions specify that the username should only contain alphabets (a-z), numerals, underscore (_), or hyphen (-). A text input field contains "shami". There is a "Website Template" dropdown menu set to "personal" and an "If Business, select category" dropdown menu set to "-select-". A "Create Websitename" button is at the bottom. The footer includes "HOME" and "An EdSery Initiative".

To enter into the world of HumThum, the user needs to own a site. To avail this service, the user needs to register his domain name in HumThum. Once the admin approval is received for that particular domain name, then user will be intimated through SMS.

This screenshot shows the same domain creation page as the previous one, but with a green confirmation message: "Your website will be activated after Admin approval which might take upto 24 hours". The "HOME" button and "An EdSery Initiative" logo are also visible.

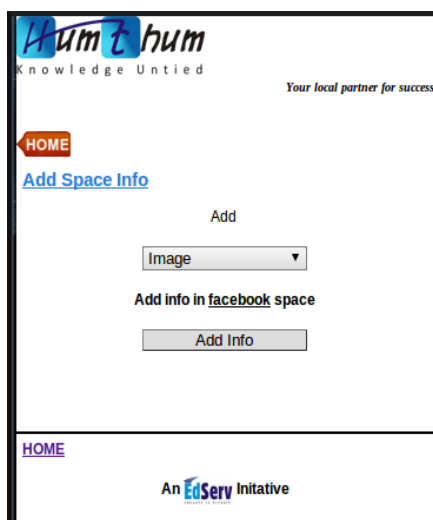

3. BASIC OPERATIONS

3.1 My Space: Create your own space

Create your own space to share your Images, Videos, Audios and Text Documents. ‘My Space’ has the feature of privacy settings. Managing and deleting your space is also possible in ‘My Space’. (Default space will be created in the name of the domain name)

3.2 Add Info: Add information in your web space

This provides you an easy way to upload your text, image, video and audio into your web space. To upload your stuff, click ‘Add Info’ icon, then choose the type of file you are going to upload. In the upload page, choose the file to upload from the mobile, and then give the title to the file and click ‘Upload’ button. Your file will be uploaded.

3.3 Manage Space: Manage your space visibility

HumThum is created with user privacy settings as the topmost priority. User can edit the privacy settings of

their document visibility to others.

To edit the settings, click 'Manage Space' → select the setting as 'Public/My Group/Secure' in the particular space → click 'Set Visibility' to change.

3.4 News

“Nothing travels faster than light, with the possible exception of bad news, which follows its own rule”-

Douglas Adams.

Get the real crunch of hot news and updates about pin code which is updated by people like you in the same pin code.

3.4.1 To view news by

- Go to HumThum application and click 'News option' and get update of your pin code.
- To get the other area's news updates, go to your mobile browser type www.areapincode.ht.im

e.g. www.600026.ht.im to get the news update of that particular pin code.

3.4.2 To Update your Area News

To update the news of your pin code, click the link 'Add News Now!' which is available in 'News option'.

To add information, click 'Add Info' icon, then choose the type of file you are going to upload. In the upload page, choose the file to upload from the mobile, then give the title to the file and click 'Upload button'. Your file will be uploaded.

3.5 Discussion

“In any war, the first casualty is common sense, and the second is free and open discussion”- James Reston.

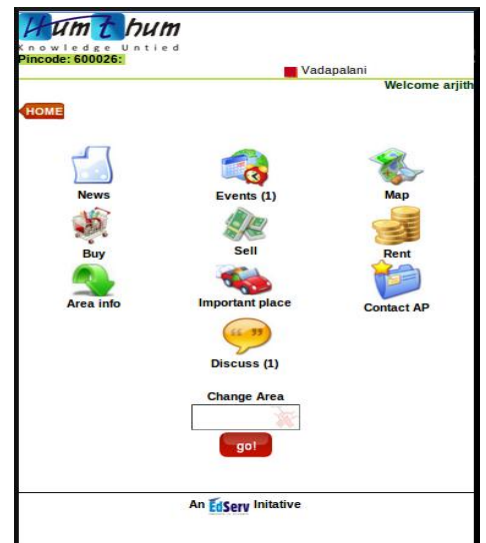

HumThum provides opportunity to the users to discuss, analyze and find solution for issues concerned to their area. By HumThum, a registered user can support or post their views about the discussion topic in their particular pin code. Users can post their opinion by clicking the topic, typing in their views and clicking the ‘Reply’ button. To start new discussion, click ‘Post New Topic’, enter the topic name and details, and then click ‘Start Discussion’.

3.6 Classifieds

5. USAGE OF HUMTHUM

5.1 Access/Restriction

Once HumThum has been installed and your account created, you cannot access your account from any other mobile. Your mobile will be registered with us and it will be your only gateway to use your account. The benefit of this feature of HumThum is that your account will be secured from any type of mishap. Only in case when someone gets access to your mobile, he can access your account. Otherwise, there's no other way for anyone to hack your account. So, HumThum guarantees you a state-of-the-art account security.

(**Note:** You cannot access your HumThum account from any other mobile)

5.2 Mobile number change

To create your HumThum account, you have to register with your mobile number and information regarding your mobile is automatically taken by the system to make your account hack-proof. Now, your HumThum account is activated for the combination of your mobile number and mobile. Any change in this combination will make your account inaccessible. Your account, in any way imaginable, cannot be accessed through other mobile nor can a request be sent for the same. But changing the SIM in your own mobile will also make your account inaccessible. In that case you will have to send a request to us to activate your account for new number. Here, you will have two options; you can use your account through both SIMs or you can de-activate your account with earlier SIM and activate it only for the new SIM. Rest assured, there is no such request application to access your account through other mobile.

5.3 Mobile phone change

To change your mobile phone you have to send a request to us via SMS to reactivate your account in your new mobile handset. Till the approval from the admin your account will be inaccessible.
